

JERICO-Next week/Kick Off meeting

28th September-01st Oct 2015, Mallorca, Spain

JERICO-NEXT is the coastal component of the European marine observing system, and is funded by the H2020 program and recently extended from a FP7 awarded project (JERICO).

The JERICO-NEXT project aims at extending the EU network of coastal observations developed in JERICO (FP7) by adding new innovative infrastructures while integrating biogeochemical and biological observations. The main target of JERICO-NEXT is to provide the researchers with continuous and more valuable coastal data coupling physical and biological information by further developing, harmonizing and integrating nationally funded marine observing systems, collecting physical, chemical and biological parameters from different platforms (ferryboxes, fixed platforms, gliders, HF radars, benthic systems ...).

A first JERICO-NEXT Steering Committee shall take place on 28th September 2015. It will be followed by the preparation of the Kick Off meeting gathering Work Package leaders, JRAP leaders and involved partners on 29th and 30th September, then the Kick Off meeting on 1st October 2015.

THE JERICO-NEXT WEEK AT A GLANCE:

When?	What and Who?	Where?
Monday 28 Sept. 2015 16:00-18:30	JERICO NEXT Steering Committee (<i>only WP leaders and co-leaders</i>)	Club hotel Pollentia Mallorca
