

**Workpackage 11
Virtual Access**

Main objectives

- Definition of the JERICO-RI Virtual Access (VA) Concept that will drive the development of VA services (including the new e-JERICO).
- Provide and facilitate centralized access to JERICO-S3 RI resources (data, products, services, best practices, VRE tools, platforms, e-libraries and e-training modules) through e-JERICO.
- Support JERICO-S3 VA services (21 of several types): provision of service, outreach and expert assessment.
- To measure access metrics to the JERICO-S3 virtual services.

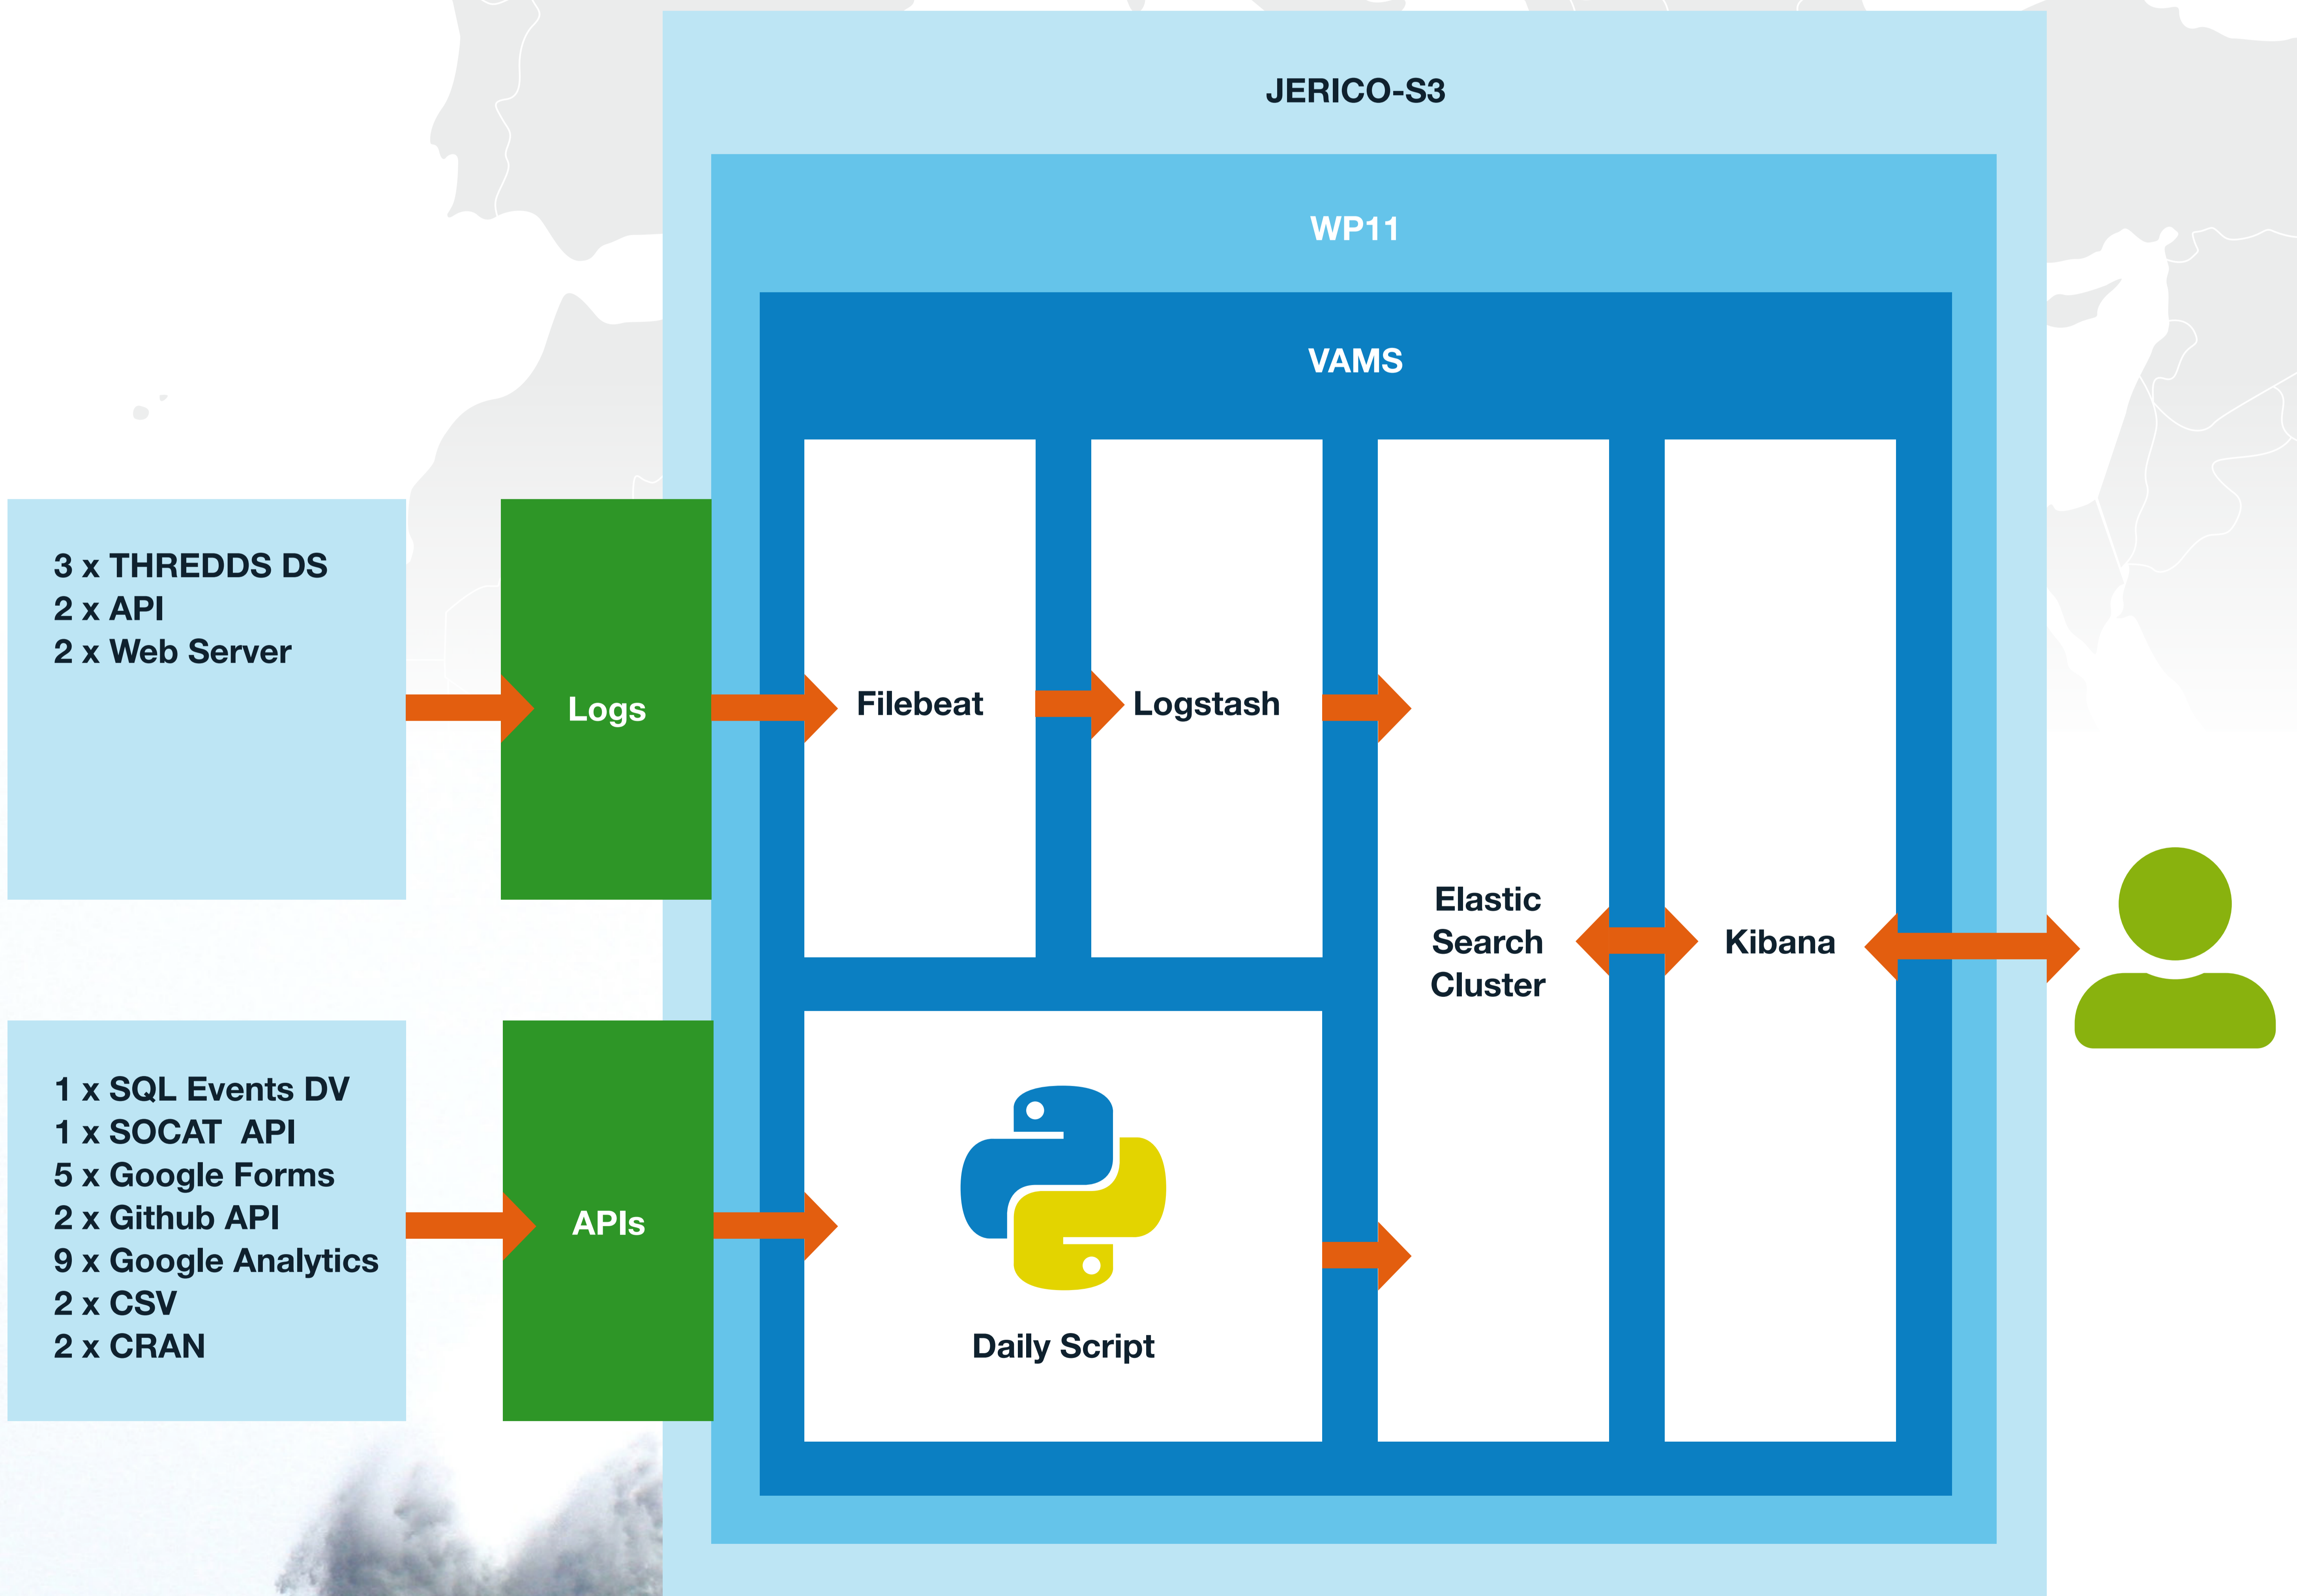

Main results

- Definition of the the JERICO-RI VA Concept
- Implementation of the JERICO-RI Virtual Access Metrics System (VAMS) that eases monitoring access metrics
- Outreach support to JERICO-S3 VA services
- Task 11.1 submitted
- Setting up of the VA Expert Panel: first assessment of the VA services is about to be completed (Task 11.2)

Planned outcomes:

- Task 11.1:** First report on VA JERICO Resources access statistics and service provision
- Task 11.2:** VA Intermediate Report from external international board
- Task 11.3:** Second report on VA JERICO Resources access statistics and service provision
- Task 11.4:** VA Final Report from external international board

This project has received funding from the European Commission's Horizon 2020 Research and Innovation programme under grant agreements No 871153 and 951799.
