

*Roma - 29<sup>th</sup> February – 1<sup>st</sup> March 2012 - National Research Council (CNR)*

## **First JERICO Fixed Platforms (FP) workshop**

Contributing to the activities of Workpackages 3 and 4

**Session 3: Maintenance methods: biofouling (WP4 - T4.2)**

## **Biofouling Questionnaire: preliminary analysis**

M. Palmali; E. Trentin (ISMAR-CNR)    G. Petthakis (HCMR)

# Session 3: Maintenance methods: biofouling (WP4 - T4.2)

## Biofouling Questionnaire: preliminary analysis

JERICO QUESTIONNAIRE	
<i>PLEASE COMPILE ONE QUESTIONNAIRE FOR EACH INFRASTRUCTURE/INSTALLATION</i>	
<b>Task 4.2 Biofouling prevention</b>	
<b>Overview of currently used biofouling prevention methods</b>	
<b>Infrastructure/Installation</b>	
NAME/DESIGNATION (if any)	
TYPE OF INFRASTRUCTURE (e.g. buoy, ferrybox, glider, etc.)	
OPERATIONAL AREA (e.g. Baltic Sea, Mediterranean Sea, etc.)	
GEOGRAPHICAL COORDINATES (if applicable)	
DISTANCE FROM THE COAST (km)

your observing stage scale?  
 your monitoring stage scale?  
 does which your  
 For an anti-  
 needs to be  
 (i.e. it is  
 For systems  
 for maintenance  
 of this  
 extended  
 copper tubing  
 are of the  
 between  
 various types of biofouling (Diatoms, barnacles, soft-fouling, soft-fouling) sensors  
 physical, optical and chemical sensors?  
 Yes

# Session 3: Maintenance methods: biofouling (WP4 - T4.2)

## Biofouling Questionnaire: preliminary analysis

### Results

Only sixteen of the eighteen partners have completed the BQ (Part A)

(it is still two!!)

.....for a total of 52 questionnaires (according to the different sensors used by the partners - Part B)

**JERICO QUESTIONNAIRE**

PLEASE COMPILE ONE QUESTIONNAIRE FOR EACH INFRASTRUCTURE INSTALLATION

**Task 4.2 Biofouling prevention**

Overview of currently used biofouling prevention methods

plate, copper tubing

Yes

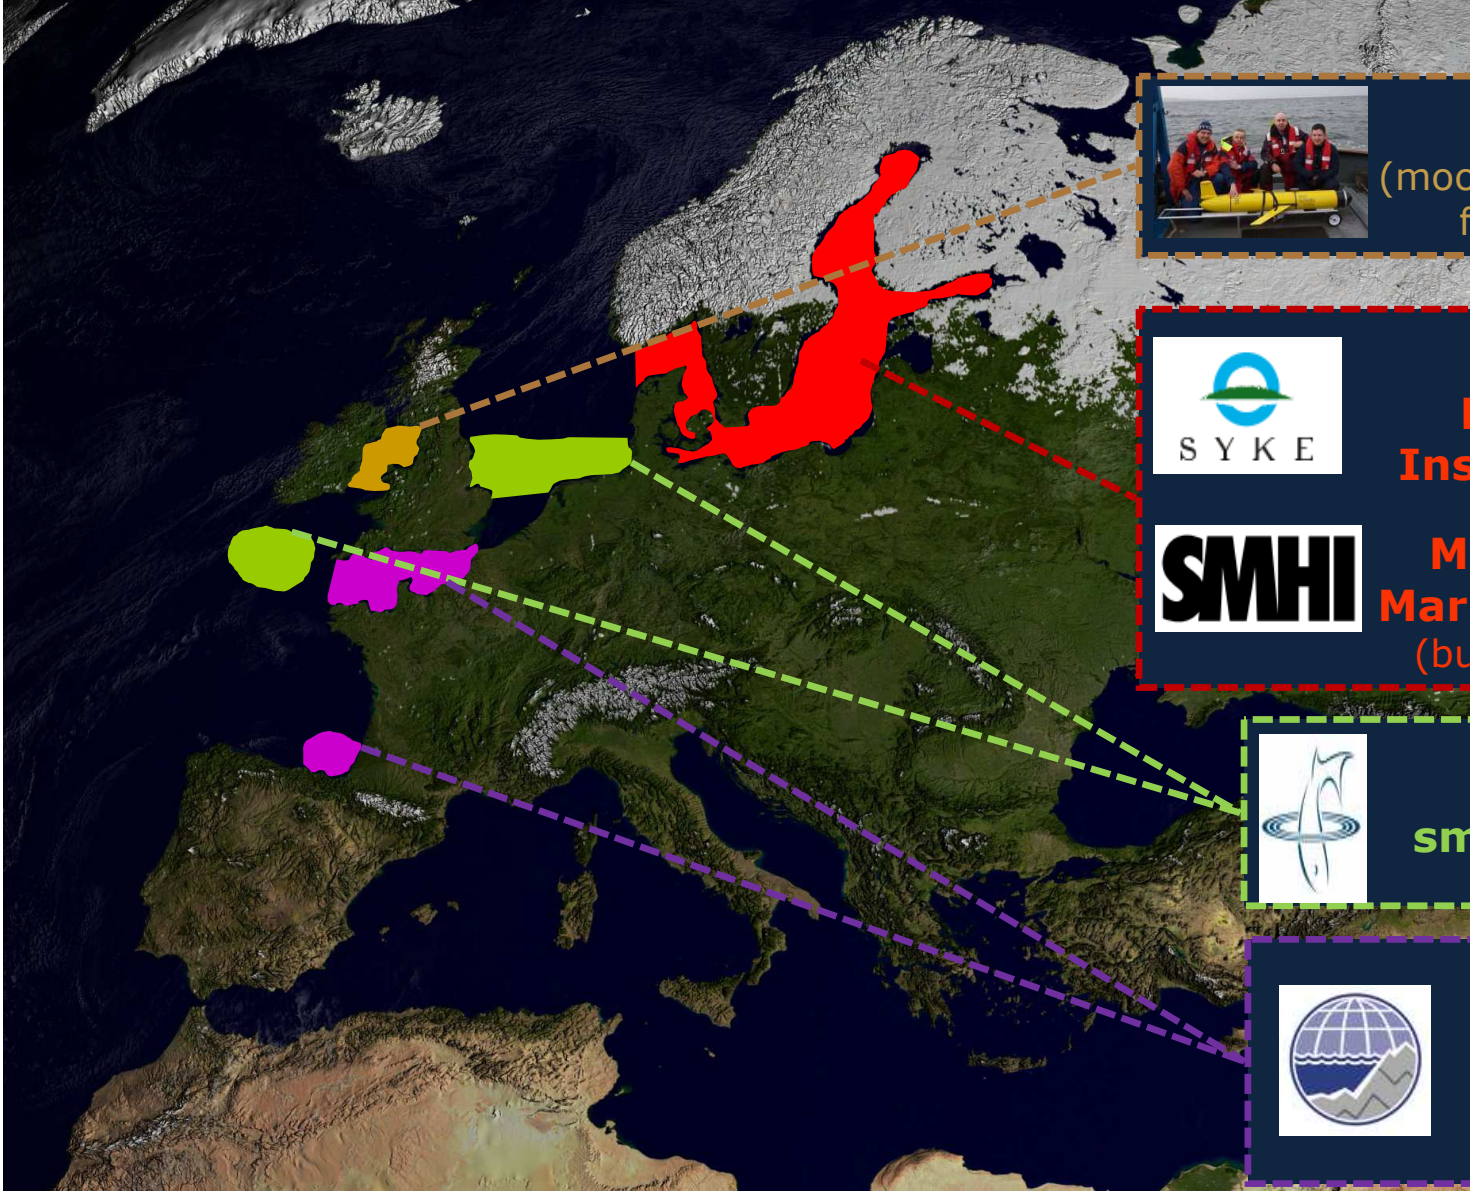

of the

water

Yes

various types of biofouling (bacteria, fungi, hard-fouling, soft-fouling) sensors physical, optical and chemical sensors?

Yes

**COBS**  
(mooring, seabed frame, ferrybox, glider)

**Finnish Environment Institute ferrybox**

**MOS – Swedish Marine Observation**  
(buoys and ferrybox)

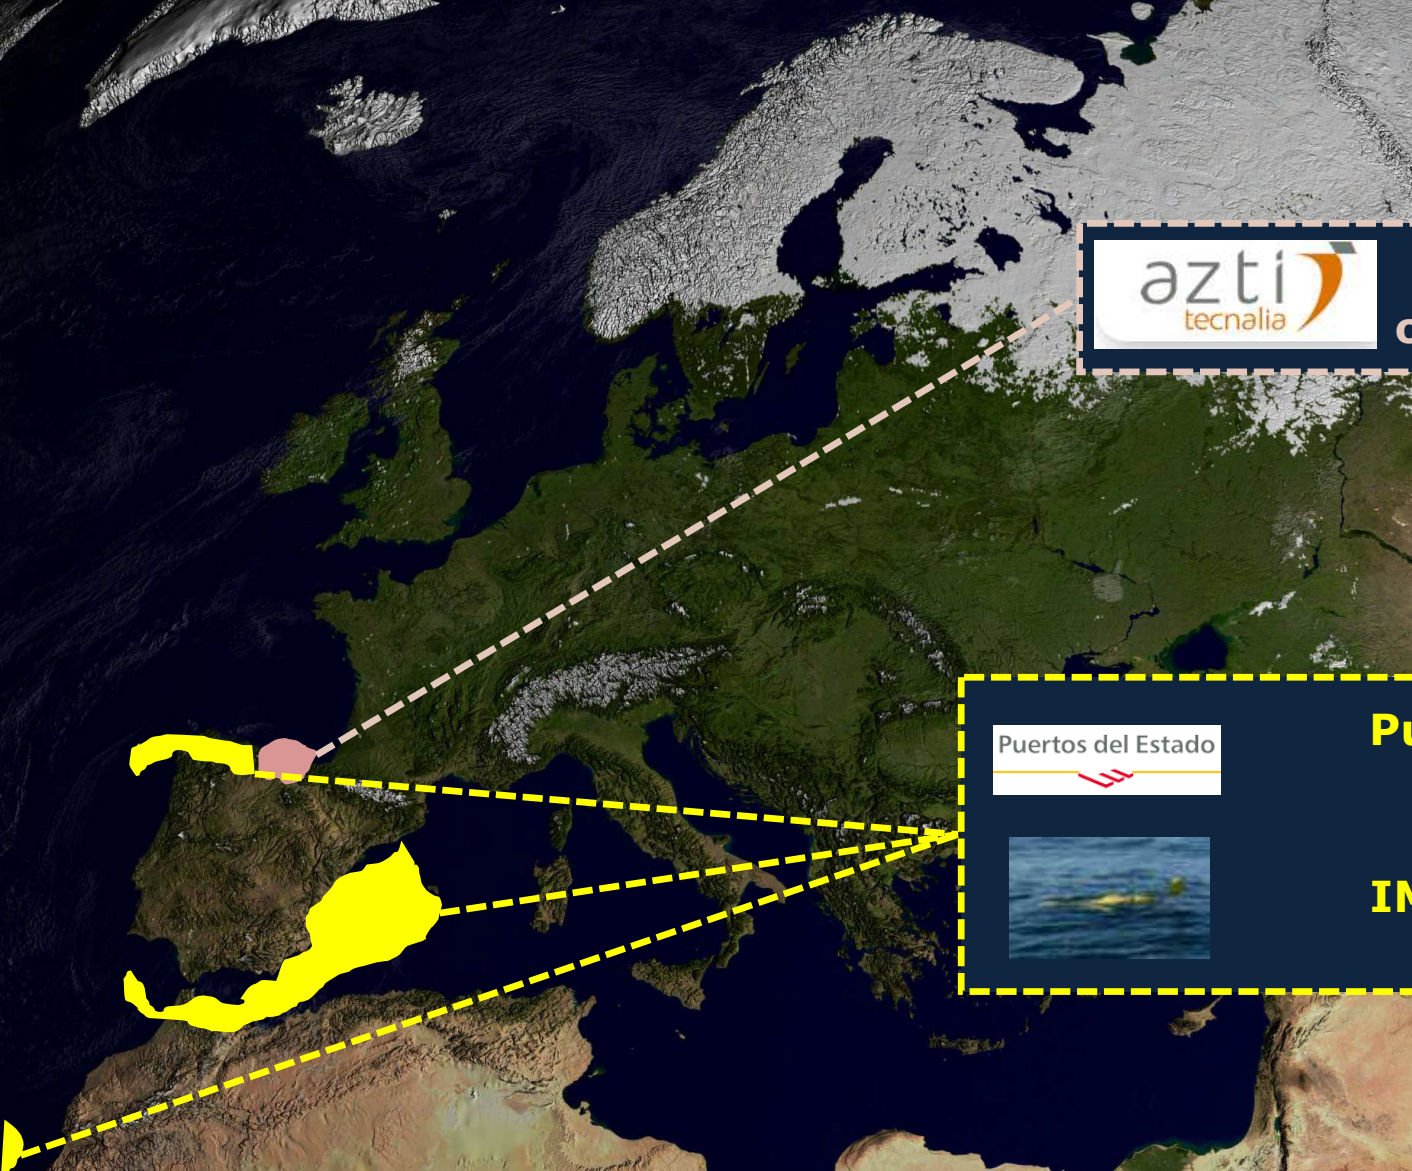

**Cefas smartbuoy**

**Pride of Bilbao**  
(ferrybox)

 **Euskalmet  
offshore buoys**

 **Puertos del Estado  
Buoys networks**

 **IMEDEA Glider Lab**

# Fixed Platforms Distribution

**EOL**  
(buoy profiler)

**OGS – North Adriatic Coastal Observatory**

**E1 & S1 buoys**  
(meteo-oceanographic multiparametric buoys)

**Acqua Alta**  
(oceanographic tower)

**Senigallia Pylon**

**Poseidon Network**  
(seawatch & wavescan buoys)

# Fixed Platforms Distribution

**Ifremer**

**SYKE**

**SMHI**

Puertos del Estado

## Fixed Platforms Distribution

**In the list of sensors below, please indicate only the ones that you are currently using on your infrastructures/installations**

### Physical

(Temperature, Conductivity (Salinity), Dissolved oxygen, Water Currents, Pressure, ecc)

### Optical

(Chlorophyll a, Turbidity, Photosynthetically Active Radiation (PAR), ecc)

### Chemical

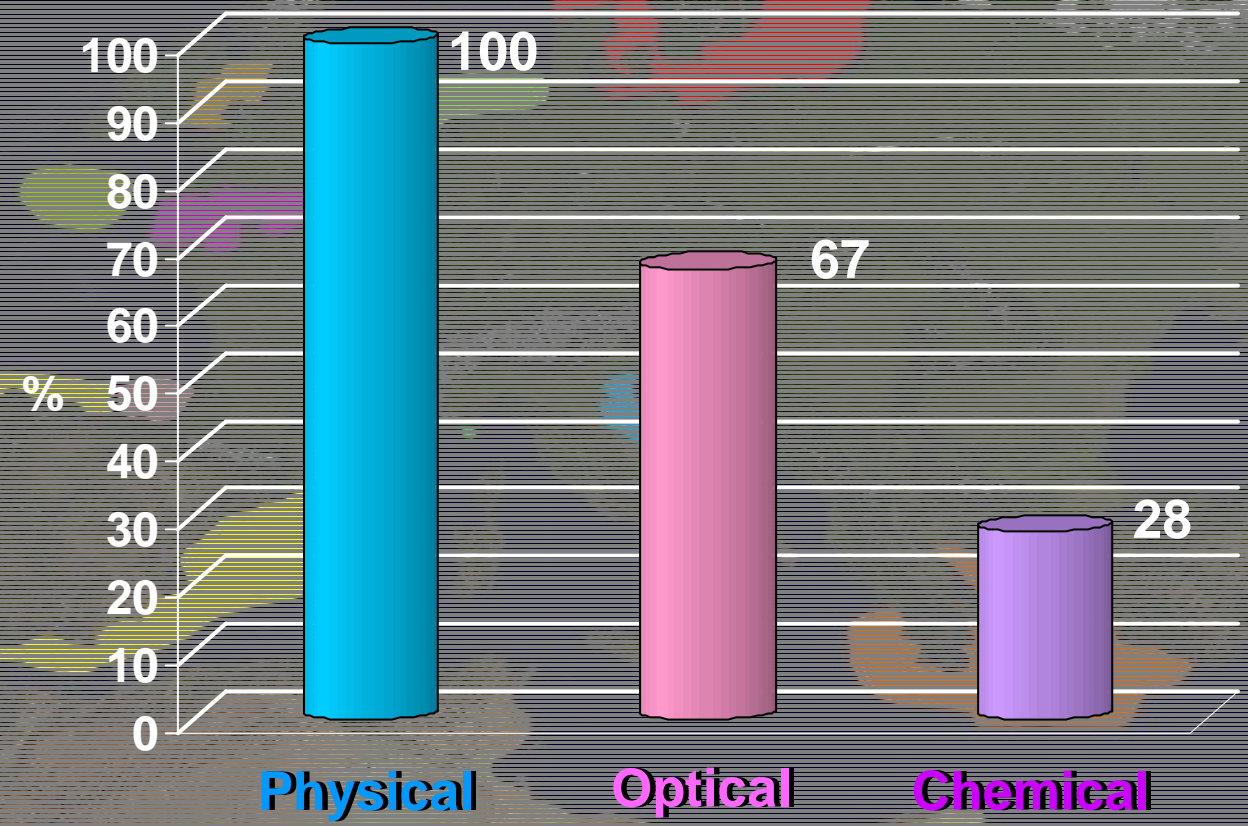

(Phosphates, Silicates, Nitrates, Nitrites, Ammonia, Dissolved oxygen, pH, Total alkalinity, Total carbon dioxide, Dissolved organic carbon, Total organic carbon, ecc)

## Fixed Platforms Distribution

## Biofouling Questionnaire: preliminary analysis

**Is biofouling a problem in your observing activity?**

**Yes or Not ?**

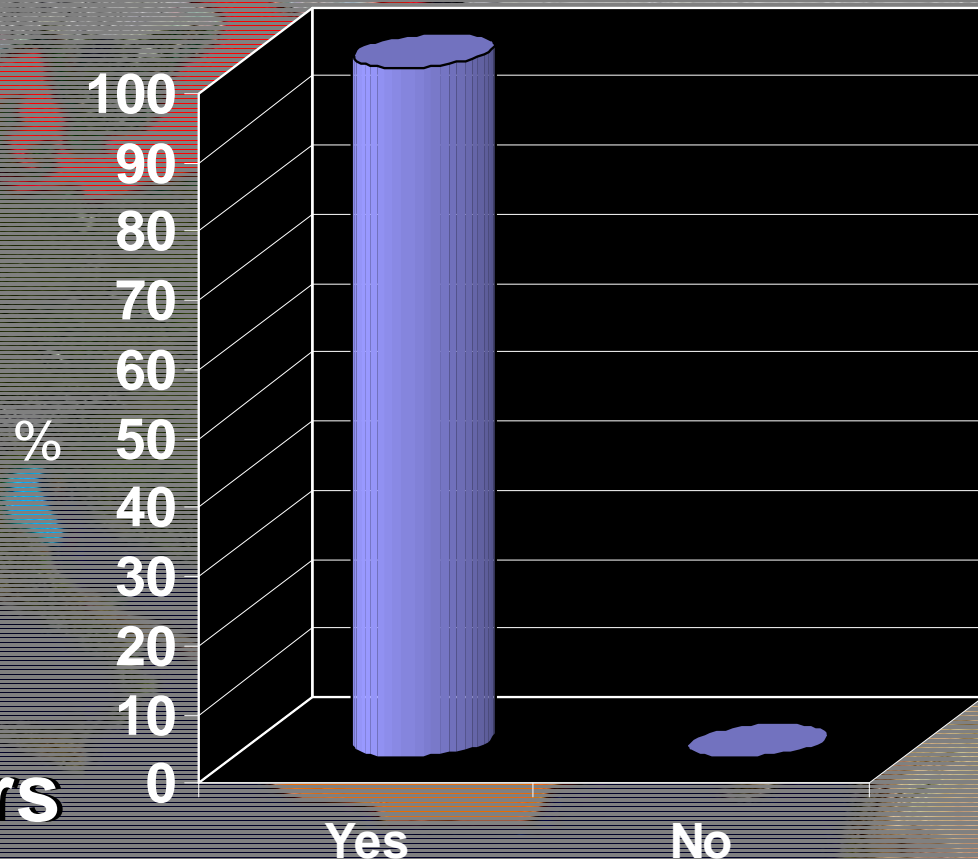

JERICO  
Biofouling Questionnaire: preliminary analysis

Is biofouling a problem in your observing activity?

Yes

The biofouling is a problem for all partners

**Biofouling Questionnaire: preliminary analysis**

**How much does biofouling influence the way in which you plan and conduct your observing activities ?**

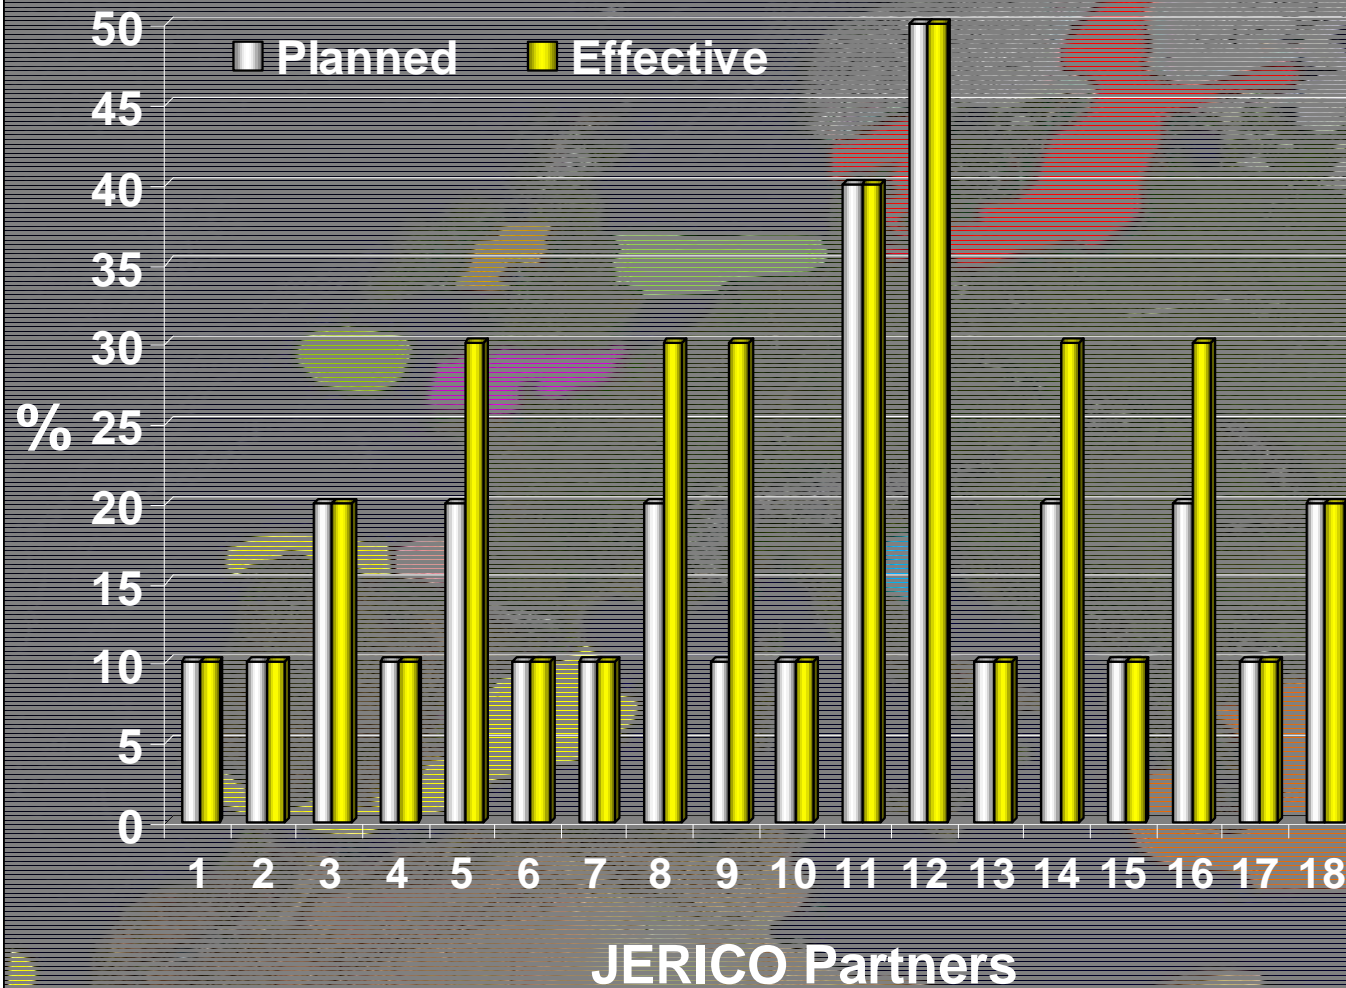

**(as a fraction of the total money and time invested on a percentage scale)?**

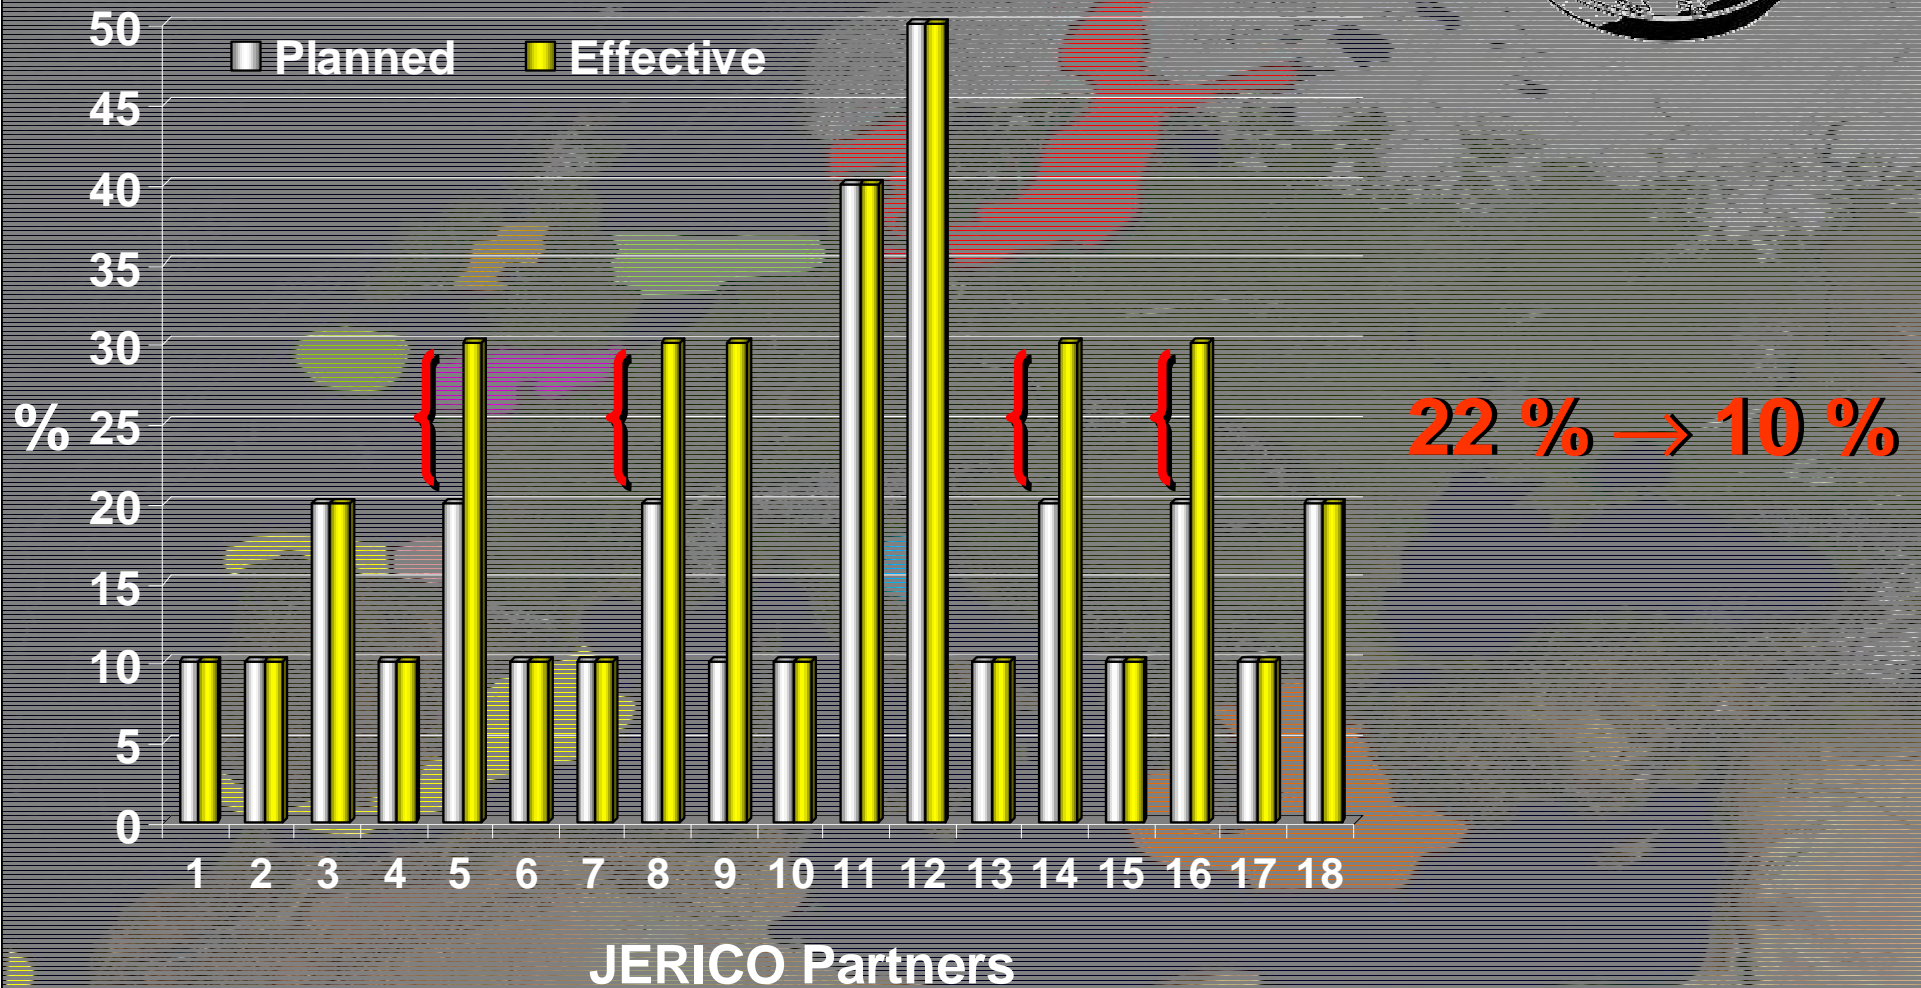

# Biofouling Questionnaire: preliminary analysis

**Biofouling Questionnaire: preliminary analysis**

**Which of the following modes of action would be preferable for an anti-biofouling system?**

**Active**

The system requires a power supply in order to function

(i.e. it needs to be energized to work, and possibly could be turned on and off)

**Passive**

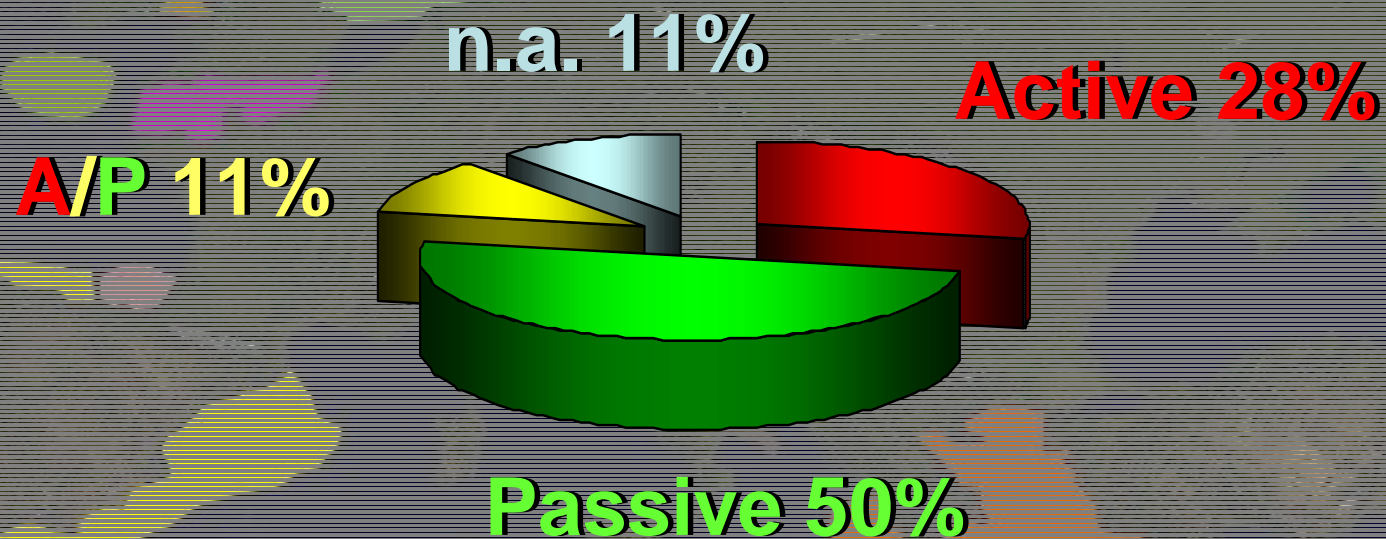

The system does not require a power supply in order to function

(i.e. it is always working, and cannot be turned off).

**Biofouling Questionnaire: preliminary analysis**

**Which of the following modes of action would be preferable for an anti-biofouling system?**

## Biofouling Questionnaire: preliminary analysis

**In the list of anti-biofouling techniques below, please indicate the ones which you currently use, which you think are the most effective and which you think are the promise for the future?**

### **Mechanical device**

(wipers or scrapers)

### **Uncontrolled biocide generation system**

(e.g cupronickel endplate; copper tubing systems; copper shutters)

## Biofouling Questionnaire: preliminary analysis

**In the list of anti-biofouling techniques below, please indicate the ones which you currently use, which you think are the most effective and which you think are the promise for the future?**

**Controlled biocide generation system**

(e.g. chlorination, electrolysis chlorination)

**Irradiation system**

(e.g. UV; US;)

**Some combination of the above**

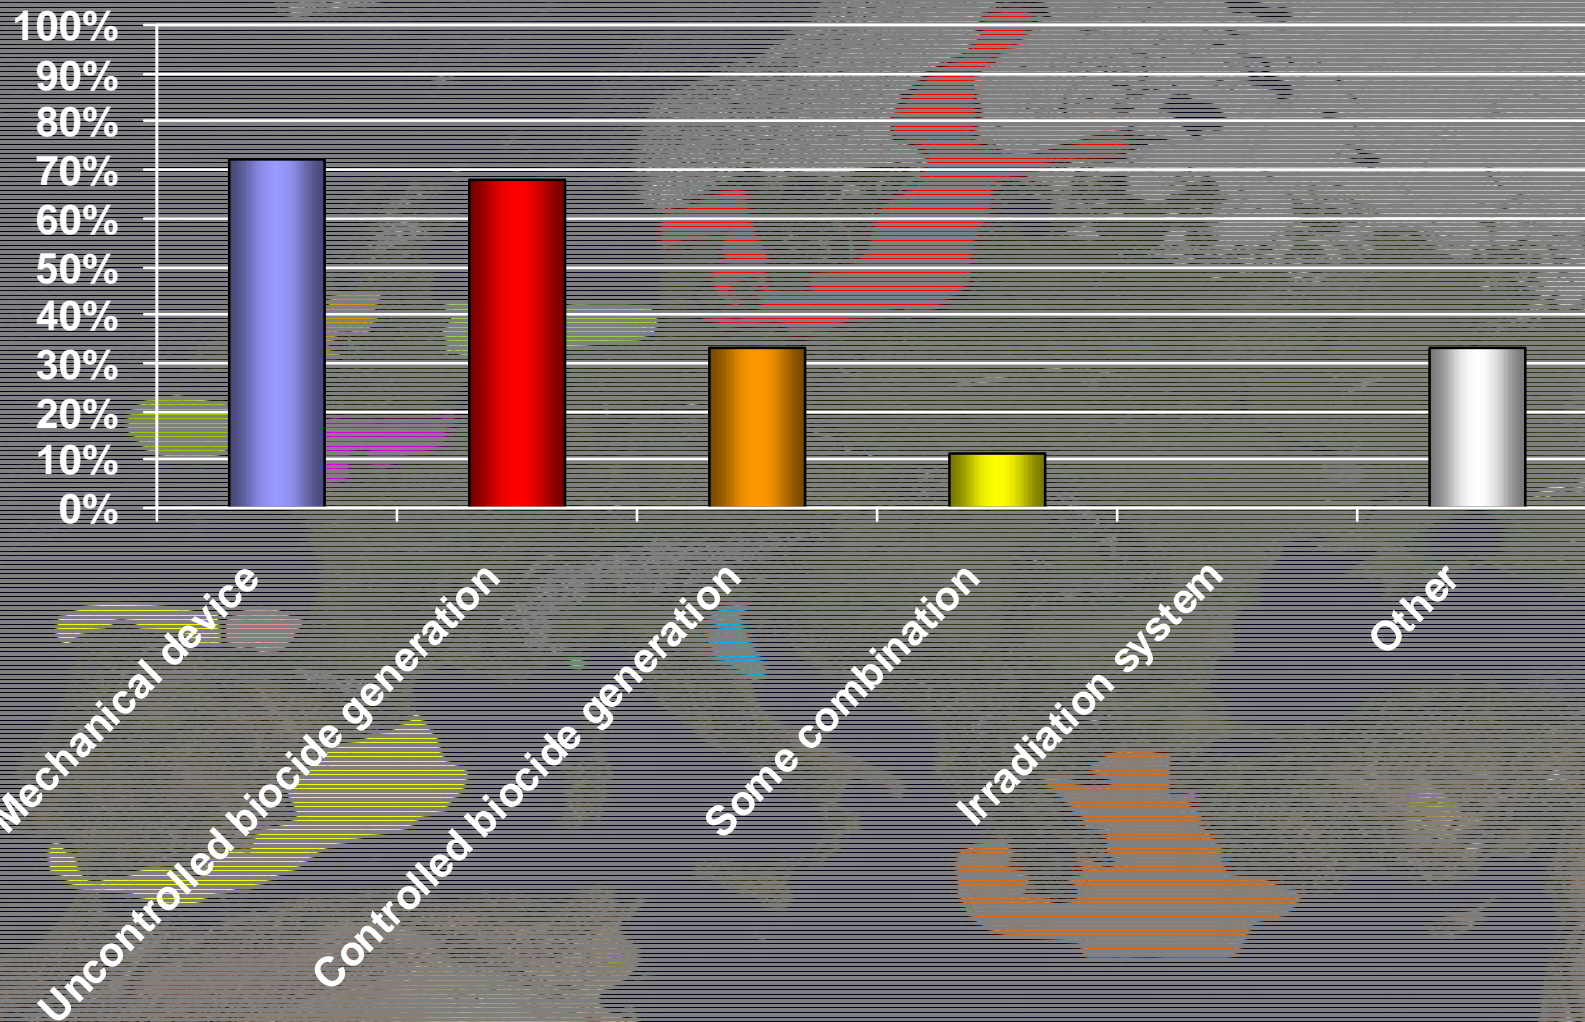

**Other system**

# Biofouling Questionnaire: preliminary analysis

## Promise for the future

## Biofouling Questionnaire: preliminary analysis

*In your view, is there any advantage to using closed-path sensor systems over open-path ones from the perspective of the biofouling problem ?*

**Yes or Not ?**

### **Closed-path systems**

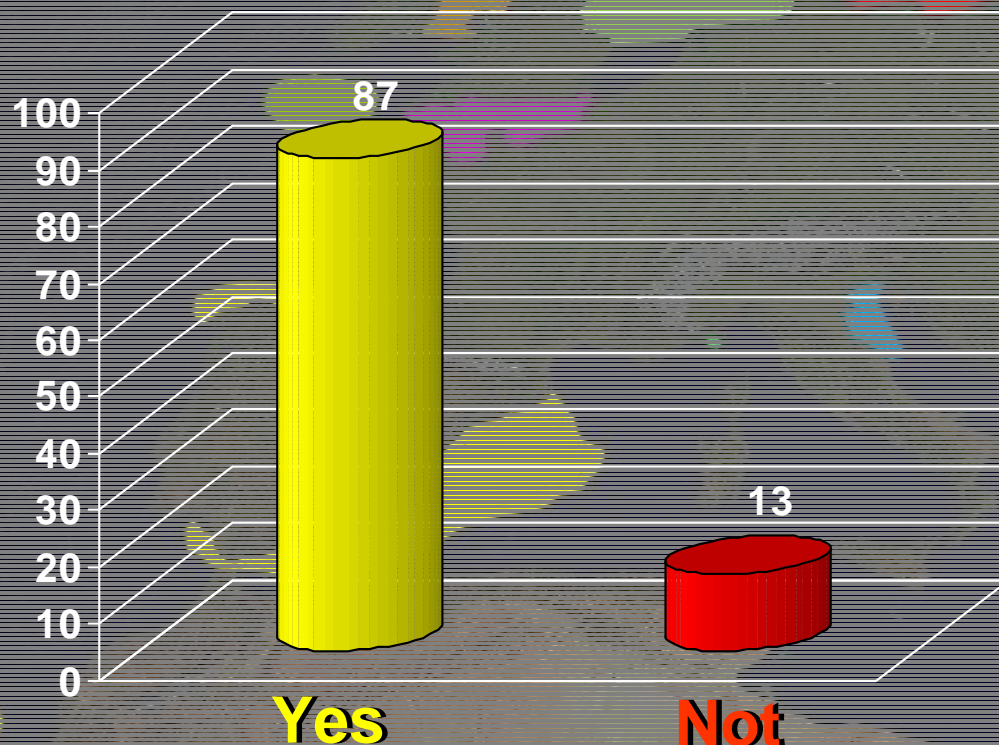

(i.e. systems where sensors are served by a single, closed hydraulic circuit with just one entrance and one exit for a sample stream)

### **Open-path systems**

(i.e. systems where sensors are not served by a closed hydraulic circuit)

## Biofouling Questionnaire: preliminary analysis

*In your view, is there any advantage to using closed-path sensor systems over open-path ones from the perspective of the biofouling problem ?*

**Because closed-path systems are better?**

- Easier maintenances
- More efficient protection
- No light < Biofouling

## Biofouling Questionnaire: preliminary analysis

**There are differences in extension/distribution of the various types of biofouling between physical, optical and chemical sensors?**

**Yes or Not ?**

## Biofouling Questionnaire: preliminary analysis

**There are differences in extension/distribution of the various types of biofouling between physical, optical and chemical sensors?**

# Biofouling Questionnaire: preliminary analysis

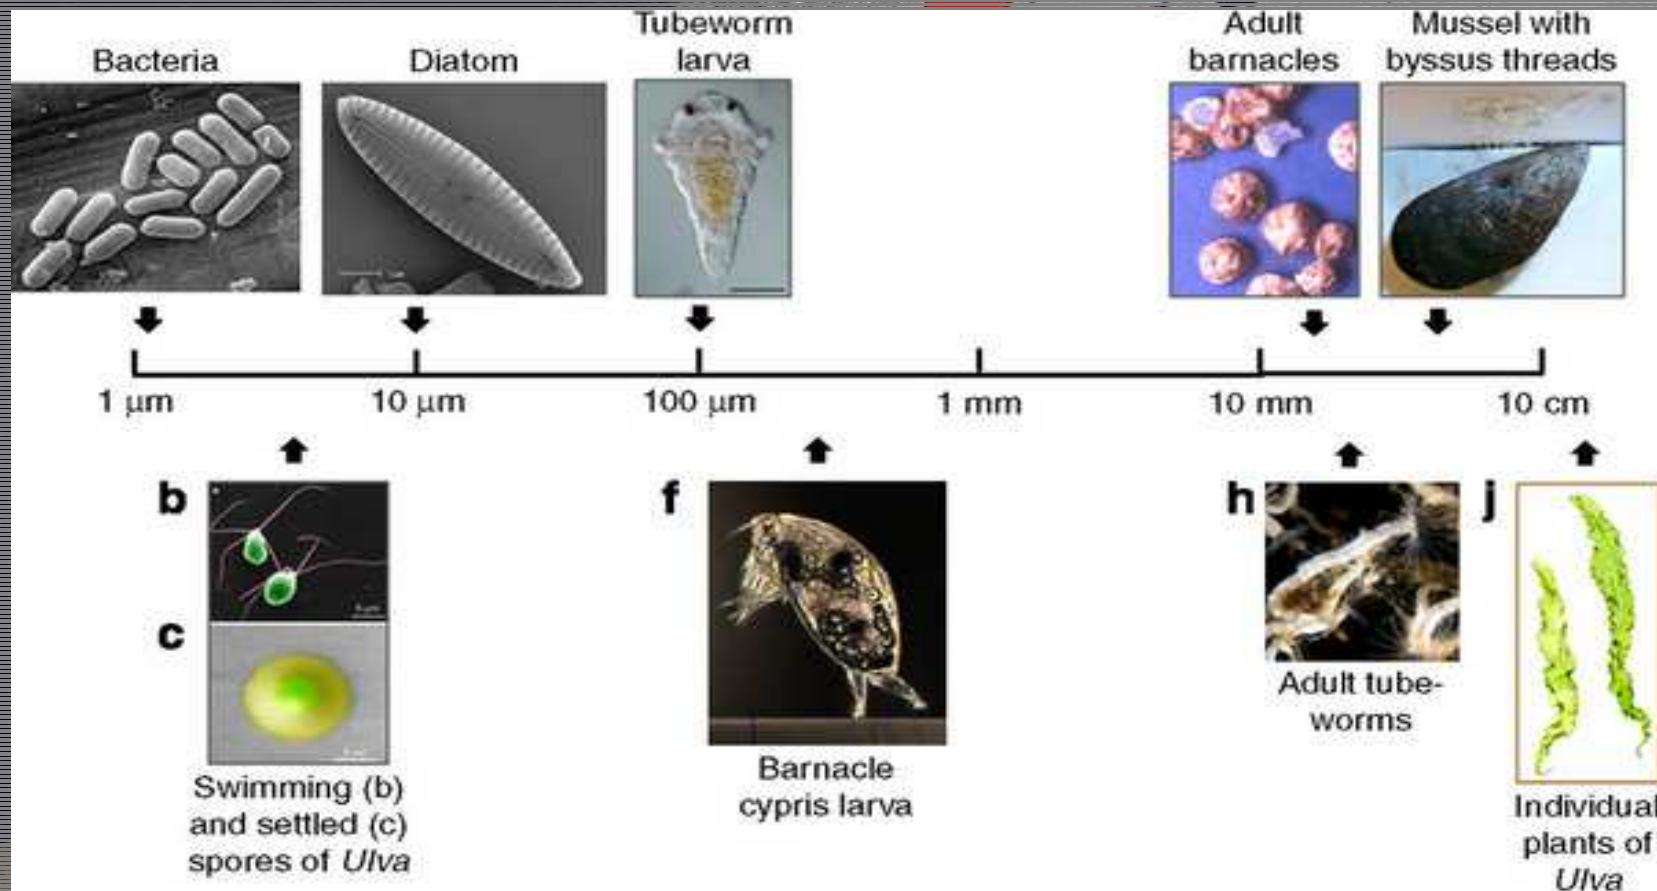

## No differences in biofouling composition between physical, optical and chemical sensors?

## Biofouling Questionnaire: preliminary analysis

**No differences in biofouling composition between physical, optical and chemical sensors?**

**Biofouling Questionnaire: preliminary analysis**

**Do you have any suggestions for choosing/promoting / developing new antifouling systems specific for sensors ?**

**Yes or Not ?**

**Biofouling Questionnaire: preliminary analysis**

**Do you have any suggestions for choosing/promoting / developing new antifouling systems specific for sensors ?**

## Biofouling Questionnaire: preliminary analysis

### Some suggestions from partners

- New energized bubble system for cleaning
- Keep sensor in deep water when not used
- New engineered non-toxic AF paint

Many thanks for your attention!!

Many thanks for your attention!!
